51.0044
VASECTOMY Clamp 14 cm
Ø 4,7 mm

51.0043
VASECTOMY Clamp 14 cm
Ø 3,0 mm

The „Non Scalpel“ Vasectomy is the favoured method by Surgeons because

- unlike during the traditional procedure
- neither scalpel nor incision, but merely 2 small punctures in the skin are required. Less discomfort and reduced risk of bleeding and infection are the positive results for the patient when the Non Scalpel Vasectomy is performed.
